Ultrabronz tanning provides color results immediately. Your natural-looking dark results will continue to increase even 24-48 hours after tanning! Generally it takes a few hours for low-pressure results to manifest and usually it begins with redness of the skin. **Ultrabronz** tanning requires 3 sessions for a seriously dark base tan and can be maintained with just 2 visits a month. That certainly beats tanning 3 times a week. Our **Ultrabronz** 950 bed also filters out most of the dangerous UVB rays that are responsible for sunburns.
